

Paper 1 : Trist + Bamforth.

- Technological change → broke apart social dynamics.
- No one has visibility of the whole task. Social fabric was lost. Δ Conflicting
- Mechanization may be problematic — can break down trust relationships.

Before:

Paper 2

- Six laws
- Giddens: 5th law history of tech is most important?
- 4th law: non-technical factors are important.
- Parallels between "Unifying Theory" (late 19th - early 20th century) and modern AI/ML work. How fast can technology be deployed?
- What's driving technology is whisked by tech and it
